Dani Amsalem

Mobile: 408-768-0568
Email: dani@theamsalems.com

Front end dev with a knack for the marketing industry. My technical focus has been on JavaScript and associated frameworks.

Summary

Development Skills

- My JavaScript starts with vanillaJS and jQuery and has matured into a focus on ReactJS often using NextJS.
- My CSS background is in Bootstrap and Foundation and later SCSS written from a BEM perspective. I also enjoy CSS-in-JS such as Styled Components.
- I've worked with several content management systems (CMS) including headless options such as Sanity and Dato.
- I currently work in an Agile environment using Scrum methodologies with Atlassian.

Projects

SignUpGenius

CF, AngularJS, HTML, CSS
Full stack maintenance on a very large, high-traffic site using a combination of ColdFusion and AngularJS.
Currently spec'ing out a rebuild using NextJS and Sanity CMS

TimeTap Blog

ReactJS/NextJS, StorybookJS, StyledComponents, Sanity CMS
Built a new blog using Reacts components built in the NextJS framework with data supplied by Sanity CMS using Groq. Established new testing practices using Storybook. Migrated blog posts by web scraping and then streaming assets into Sanity using NodeJS.

Colorado Plastic Surgery

HTML, SCSS, PHP, JS
Performed regular updates and site optimization taking mobile PageSpeed Insights from 19 to 82 and desktop from 57 to 99.

Dr Halaas

HTML, SCSS, MVC PHP, JS, Dato
Maintained the site by expanding functionality and structure.

Sadrian Plastic Surgery

HTML, SCSS, PHP, JS
Along with regular updates, also optimized the site improving mobile scores from 52 to 77 and desktop from 81 to 99.

Dr Karam

HTML, SCSS, PHP, JS, Dato
In addition to consistent updates, optimized the site bringing mobile scores up from 33 to 73 and desktop from 81 to 99.

Vasper Systems

HTML, SCSS, PHP, JS
Created a website highlighting functionality and benefits for a health and fitness tool used by NASA and the military. A combination of Slick Slider and Vanilla JS animates components for improved visuals. Most content can be accessed and changed in the WordPress dashboard.

Victory Martial Arts

HTML, SCSS, PHP, JS
Constructed a large, custom WordPress site using ACF to make content editable in the WordPress CMS. Reverse-engineered existing online architecture and rebuilt it using more modern technology.

PowerPlay

HTML, SCSS, PHP, JS
Built out a very large, custom WordPress website using Slick Slider for responsive carousels and heavy use of CSS Grid and Flexbox for a more structured visual layout. Much of the site can be accessed and edited in the backend.

Courtyard Farm

HTML, SCSS, PHP, JS
Developed a custom WordPress website using Slick Slider for mobile-friendly carousels and the Lity Lightbox for custom functionality.

A&M Property Investments

HTML, CSS, PHP
Coded a template used by a national real estate firm to showcase their properties in Chicago, New York, and Portland. All content is editable in the WordPress backend.

Decryptionary.com

WordPress

Sketched, built, and sold the simplest Bitcoin and blockchain dictionary. Contains hundreds of entries and a variety of visual walkthroughs, several word lists and more.

Experience

Software Developer

SignUpGenius — Remote — October 2021 to Present
- Planned, refined and developed a new front-end using React components built in the NextJS framework with data supplied by Sanity CMS over Groq. Established new testing practices using Storybook and handled data migration over NodeJS.
- Maintained the full stack of a family of SaaS, using a variety of technology including AngularJS, ColdFusion, and WordPress.
- Structured responsive email templates using the MJML framework.

Site Reliability Developer

Studio 3 Marketing — Remote — June 2020 to October 2021
- Managed dozens website updates for features, ADA compliance and site speed with average mobile scores improving 149%.
- Regularly built and revised modules for Dato, a headless CMS.
- Created and administered AWS LightSail instances.
- Primary languages, frameworks, and tools included Dato CMS, GraphQL, PHP, SCSS, and JavaScript.

Web Developer
